

## UNITED STATES - WYOMING

**Wyoming** is not only the land of cowboys, livestock and hundreds of miles of uninhabited lands, but the State where the “**wild hub**” of fly fishing in the United States is located.

The **Grand Teton** and **Yellowstone National Parks** along with the famous waters of the **Snake** and **Green Rivers** make this a place where you can accomplish a Grand Slam of the four species of trout that live here.

The Green River is well known for its large and wild population of **brown trout**, **rainbow** trout and the highly desired **cutthroats**.

The main attraction of the Wyoming rivers is, as we have already mentioned, the Cutthroat trout in all its variants (**Colorado** river, **Snake** river, **Bonneville** and **Yellowstone** river).

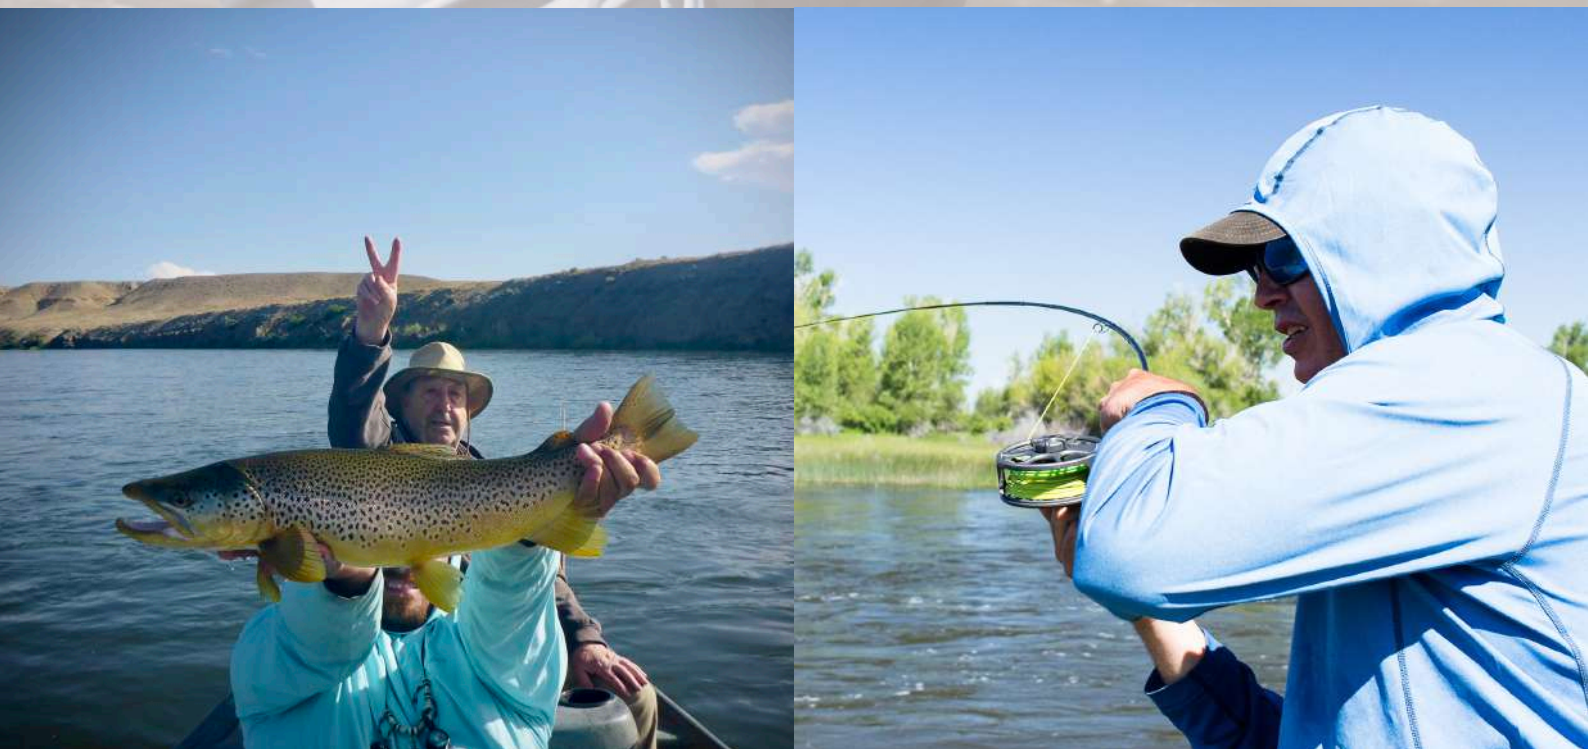

The Green River **Seedskadee Refuge** is a special regulation area in which only a few guides have the permits to carry out the floating trips. Only 4 boats per day are allowed to guide.

The large number of trophy trouts you can catch (+60cm) makes this trip really special one, **A FISHING TRIP OF A LIFETIME.**

**ALL OUR TRIPS ARE HOSTED by  
IKANTRAVEL and OUR LOCAL PARTNER**

This adventure does not end here. As we have already said, another of the attractions of Wyoming is **fishing in remote areas**, located in the Natural and National Parks that run through the State, areas of absolute beauty where in addition to fish, you will share the day with different species of **wild animals**, such as **deer**, **pronghorn** (American antelope) or **bison**, among others.
